

INDEX

A

Abel, N. H., 6, 11, 35, 68, 380
 Abel's binomial series, 68 (Ex. 3.9)
 Abel's identity, 11 (Ex. 4.7), 35
 Abel's theorem, 35 (Ex. 5.16)
 Abelian differential, 380
 Abelian group, 6
 Absolute value, 8, 19, 254 (Exs. 2.1, 2.2)
 of function, 28
 Addition theorem, for exponential function,
 14, 67, 68 (Ex. 3.8)
 for logarithm, 14
 Adhere, 40
 Adherence, 40
 Alexandroff, P., 54
 Alexandroff compactification, 54
 Algebraically closed, 17
 Analytic, at, in, on, 62, 161, 356
 at infinity, 161
 Analytic continuation, 286–293
 Analytic element, 286
 center of, 321
 value of, 321
 Analytic entity (= *analytische Gebilde* in
 sense of Weyl), 359–368
 compact, 368–379
 inverse of, 365 (Ex. 2.5)
 Analytic function, inverse of, 146
 local behavior of, 148, 149
 Analytic map, 357
 multiplicity of, 357
 valence of, 368
 Angle, 256
 Ankeny, N. C., 122
 Annihilate, 371
 Arbitrarily large n , 10

Arc, 49

 analytic, 345
 initial point of, 49
 Jordan, 345
 product, 49
 regular, 345
 terminal point of, 49
 Archimedian ordering, 10 (Ex. 4.6)
 Arctan, 86 (Ex. 7.1)
 Arcwise connected, 49
 Argument, 71
 continuous, 72
 principal, 71
 Argument principle, 171
 Artin, E., 230, 233
 Artin's proofs of Gauss multiplication for-
 mula and Stirling's formula, 233 (Exs.
 1.2, 1.3)
 Associated function, 79, 85
 Associative law, 5
 Automorphisms, 6

B

Backlund, R. J., 131, 149
 Ball, 23, 50
 Banach, S., 278
 Banach space (right), 278
 Barycenter, 93 (Ex. 9.2)
 Bernstein, S., 176
 Bers, L., 195, 200, 389
 Bers, theorem of, 200–204
 Bessel, F. W., 69, 138, 155, 217, 285
 Bessel equation order 0, 69 (Ex. 3.12), 138
 (Ex. 6.13)
 Bessel equation order k , 155 (Ex. 1.6)
 Bessel equation order λ , 285 (Ex. 5.7)

- Bessel function order 0, 69 (Ex. 3.12), 138
 (Ex. 6.13), 217 (Ex. 6.1)
 Bessel function order k , 155 (Ex. 6.1)
 Bicylinder, 269
 closed, 269
 Bieberbach, L., 298
 Binomial series, 68 (Ex. 3.9)
 Birkhoff, G. D., 157
 Bisections, method of successive, 44
 Blaschke, W., 224, 226
 Blaschke condition, 224
 Blaschke product, 225, 226
 Bôcher, M., 131, 134
 Bohr, H., 230–233
 Bohr's characterization of gamma function,
 232, 233
 Borel, É., 44
 Bound, greatest lower, 8
 least upper, 8
 lower, 8
 upper, 8
 Boundary maximum principle, 175 (Ex.
 4.29)
 Bounded, 8, 24
 Bounded above, 8
 Bounded analytic functions, 224–228
 Bounded below, 8
 Bourbaki, N., 39
 Brouwer, L., 131
 Brouwer fixed point theorem, 131 (Ex. 5.10)
- C**
- C^∞ , 65
 $C'(O)$, $C''(O)$, 83
 Canonical map σ , 21
 Carathéodory, C., 9, 58, 67, 176, 343
 Carathéodory's formulation of derivative,
 58
 Carathéodory's theorem on variable regions,
 343, 344
 Carleman, T., 303, 304, 321
 Carleman, extension principle of, 303, 304
 Cartesian product, 4
 Cauchy, A., *see below*
 Cauchy, majorant calculus of, 273–277
 method of, 185, 186
 application of, 191, 192
 Cauchy condition, 16
 Cauchy formula, annulus, 114 (Ex. 3.6)
 disk, 108
 polar form, 77
 strip, 120
 Cauchy inequalities, for coefficients of
 Laurent expansion, 155 (Ex. 1.4)
 of power series, 33 (Ex. 5.9)
 two variable theory, 271 (Ex. 3.2)
 Cauchy inequality for inner product, 36
 Cauchy integral theorem, for annulus, 114
 (Ex. 3.6)
 Weierstrass classes, 321–322
 Cauchy multiplication, 34 (Ex. 5.13), 267
 (Ex. 1.1), 268 (Ex. 2.3)
 Cauchy principal value, 319
 Cauchy sequence, 16, 24, 51
 uniform, 51
 Cauchy type, integral of, 134
 boundary behavior of integral of, 319,
 320
 repeated integral of, 271 (Ex. 3.4)
 Cauchy–Goursat theorem, 104–124
 homotopic versions of, 111–113
 for rectangle, 106, 107
 simplicial, 106
 for singular cell, 109, 110
 Cauchy–Hadamard theorem, 31, 56 (Exs.
 6.7, 6.9)
 Cauchy–Riemann equation(s), 85, 86
 in polar form, 87
 Cauchy–Schwarz–Buniakowsky inequality
 for integrals, 78 (Ex. 5.4)
 Center function, 321
 Cesàro, E., 25
 Chain rule, 59, 81 (Ex. 6.6)
 Chordal distance, 177
 Chordal metric of $\mathbb{C}$, 177
 Christoffel, E., 347
 Circle, 23
 Circular disk, 23
 Circumference, 23
 of convergence of power series, 30
 cis, 70
 Closed, 40
 Closure, 40
 Cluster at, 40
 Cluster value, 171
 Commutative, 6
 Compact, 43
 Compactification, 53
 Alexandroff (one point), 54
 Complete metric space, 51

- Complete ordered field, 9
 - Complex, rational, 200
 - Complex field, 18–21
 - constructions for, 19 (Ex. 1.3), 253, 254 (Exs. 1.1, 1.2)
 - Complex plane, 21–24
 - extended, 54, 55
 - geometry of, 21–24, 254–259
 - Component, 48
 - Composition, 4
 - Conformal automorphism of $\mathbb{C}$, 175 (Ex. 4.25)
 - Conformal equivalence, 357
 - Conformal structure, 355
 - Conformality, 262, 263
 - anti-, 262
 - Conjugate, 19
 - Conjugation map, 200
 - Connected, 46
 - Connected subsets of $\mathbb{R}$, 47
 - Constant, 4
 - Contact point, 40
 - Continuation, direct, 286
 - Continuation along, 288
 - Continuation from — to —, 288
 - Continuity, lower semi-, 45, 46
 - uniform, 52
 - upper semi-, 46
 - Continuous, 12 (Ex. 4.13), 41
 - Continuous at, 41
 - Continuous on, 41
 - Continuum, 46
 - Converge absolutely, 28
 - Converge uniformly, 28
 - Convergence set, 28
 - of power series, 30
 - Convergent infinite series, 27, 28
 - Convex function, 231
 - Convex hull, 23
 - Convex set, 23
 - Coordinatization, Gaussian, 22
 - Cosine, 70
 - Covering, 43
 - open, 43
 - sub-, 43
 - Covering map, 335
 - Curve, closed, 112
 - closed, regular, analytic, Jordan, 345
 - polygonal closed, 351
 - simple, 351
 - vertex of, 351
- D**
- d'Alembert, J., 74
 - Decimal approximant, 14 (Ex. 5.2)
 - de la Vallée Poussin, C., 52, 229, 241, 242, 243
 - de Moivre, A., 70
 - de Moivre formula, 70
 - Dense, 299 (Ex. 1.10)
 - Density of rationals, 12 (Ex. 4.11)
 - Derivation, 143 (Ex. 8.3)
 - Derivative, 58
 - directional, 86 (Ex. 7.3)
 - of inverse function, 61
 - left-handed, 59
 - of meromorphic function, 169
 - right-handed, 59
 - Derivatives, first partial, 79
 - second partial, 83
 - mixed, 83
 - Diameter, 104
 - Dieudonné, J. A., 9, 94
 - Difference of sets, 4
 - Differentiable, 79, 80, 261, 270, 271 (Ex. 3.1)
 - Differential, abelian, 380
 - residue of, 381, 382 (Ex. 5.1)
 - zero, 380
 - of meromorphic function, 380
 - Differential calculus—two real variables, 79–85
 - Differential coefficients, complex, 260, 261
 - Differential equations, 274–276, *see also* Linear differential equations
 - systems of, 277, 278 (Ex. 4.5)
 - Dinghas, A., 94
 - Directional derivative, 86 (Ex. 7.3)
 - Dirichlet, G., 117, 295, 301, 302
 - Dirichlet problem, for annulus, 301, 302
 - for disk, 295
 - for region bounded by circles, 307, 308
 - Dirichlet series, 116, 117 (Ex. 3.17)
 - Discrete, 259 (Ex. 3.13)
 - Disk, circular, 23
 - semicircular, 120
 - indented, 120
 - Distance between sets, 109
 - Distance in $\mathbb{C}$, 21
 - Distance, p -, 50
 - Distinguishing function, 379
 - Distributive, 6
 - Divergent infinite series, 28
 - Division algorithm, 371

Divisor, of Abelian differential, 381
 of meromorphic function, 168, 356
 Domain of function, 4
 Domain of integrity, 267 (Ex. 1.1)
 Doubly-periodic function, meromorphic,
 313

E

Element, analytic, 286
 center of, 321
 value of, 321
 meromorphic, 362
 center of, 362
 value of, 362
 Empty set, 4
 Endomorphism, bounded, 279
 norm of, 279
 Eneström, G., 21 (Ex. 1.11)
 Entire function, 170, 216–224
 of finite order, 216–224
 order of growth of, 216
 transcendental, 170 (Ex. 4.18)
 Euler, L., 70, 136, 208, 234, 382
 Euler constant, 208 (Ex. 3.14)
 Euler formula, 70
 Euler integral, 136–137
 representation for gamma function, 234,
 235
 Euler product formula for zeta function, 207
 (Ex. 3.10)
 Euler–Poincaré characteristic, 382 (Ex. 5.3)
 Exactness, 84, 85
 Exponent of convergence of divisor, 218
 Exponential function, 14 (Ex. 5.1), 66–68, 71
 addition theorem for, 14, 67, 68 (Ex. 3.8)
 Exponential type, 158 (Ex. 1.15), 162 (Ex.
 2.12)
 Extended real line, 31, 55
 Exterior, 269
 Exterior point, 269

F

Fejér, L., 36, 37, 122, 341, 347
 Fejér theorem, 36, 37
 Fejér–Riesz theorem, 122 (Ex. 3.30), 347
 (Ex. 3.1)
 Field, 6
 sub-, 6
 generated by, 6
 Finite set, 10
 Fixed point, 24

Fourier, J., 75
 Fourier coefficient, complex, 75
 Fresnel, A. J., 121
 Fresnel integral, 121 (Ex. 3.26)
 Frontier, 40
 Fubini, G., 244, 245
 Fubini type, theorem of, 244, 245
 Function, 4
 bounded, 24
 center, 321
 even, 222 (Ex. 6.7)
 odd, 223 (Ex. 6.10)
 rational, 151
 value, 321
 value of, 4
 vector-valued, 278–285
 Functions with values in ring, product (sum)
 of, 26 (Ex. 3.5)
 Fundamental theorem of algebra, 17, 46
 (Ex. 2.5), 73, 74 (Ex. 4.12), 122 (Ex.
 3.29), 144 (Ex. 9.1)

G

Gamma function, 208, 209 (Ex. 3.14), 230–
 237
 Euler integral representation for, 234, 235
 Gauss multiplication formula for, 233
 (Ex. 1.2)
 Stirling formula for, 233, 234 (Exs. 1.3,
 1.4, 1.5)
 Gattegno, C., 340
 Gauss, C. F., *see below*
 Gauss, hypergeometric equation of, 69 (Ex.
 3.12)
 Gauss integral, 121 (Ex. 3.26)
 Gauss mean-value theorem, 89, 90
 Gauss multiplication formula, 233 (Ex. 1.2)
 Gauss theorem on zeros of derivative of
 polynomial, 92
 Gaussian coordinatization of euclidean
 plane, 22
 Gaussian plane, 22
 Gaussian sums (as treated by L. J. Mordell),
 311, 312
 Generated by, 6
 Genus, of divisor, 219
 of entire function, 222
 Geometric interpretation, of addition, 258
 (Ex. 3.11)
 of multiplication, 257 (Ex. 3.4)
 Geometric series, 28 (Ex. 4.6), 30

Geometry of complex plane, 21–24, 254–259
 Golusin, G., 340
 Greater than, 7
 Group, 56

H

Hadamard, J., 30, 31, 221, 222, 229, 242, 243
 Hadamard, theorem of Cauchy and, 30, 31
 theorem on entire functions, 222
 Hadamard and de la Vallée Poussin, Prime
 Number Theorem of, 229, 243–249
 theorem of, concerning zeros of zeta func-
 tion, 242, 243
 Hamel, G., 74, 254 (Ex. 2.2)
 Hankel, H., 236, 237
 Hankel formulas, 236, 237 (Ex. 1.8)
 Hardy, G., 241, 294
 Harmonic at, in, on, 87, 356
 Harmonic, complex formulation of, 264, 265
 Harmonic functions, Gauss mean value
 theorem for, 89, 90
 maximum and minimum principles for,
 90, 91 (Ex. 8.5)
 Harmonic majorant, principle of, 305
 Harnack, A., 297, 298
 Harnack convergence principle, 298 (Ex. 1.5)
 Harnack inequalities, 297 (Exs. 1.4, 1.5)
 Hartogs, F., 272 (Ex. 3.9)
 Heine, H. E., 44
 Heine–Borel–Lebesgue theorem, 44
 Hermite, C., 186
 Hermite, formula of, 186 (Ex. 1.8)
 Hilbert, D., 78
 Hilbert inequality, 78 (Ex. 5.4)
 Hille, E., 284
 Holomorphic at, in, on, 270
 Homeomorphism, 42
 Homothety, 24
 Homotopic, 111
 freely, 112
 Hurwitz, A., 14, 33, 180
 Hurwitz's theorem, 180
 Hurwitz's treatment, of Cauchy inequalities,
 33 (Ex. 5.9)
 of logarithm, 14 (Ex. 5.1)

I

Ideal, 201, 371
 principal, 201, 371
 maximal, 201

Identity element, of field, 6
 of group, 6
 Identity map, 5 (Ex. 1.2)
 Identity theorem for power series, 33
 Image of function, 4
 Imaginary axis, 22
 Imaginary part, 19
 Implicit function theorem, 276, 277 (Exs.
 4.2, 4.3, 4.4)
 Induction property, 10 (Ex. 4.1^b)
 Inequality, 7
 for functions, 55
 Infimum, 8
 Infinite product, 204
 associated with sequence of functions, 209
 uniformly p -Cauchy, 209
 uniformly p -convergent, 209
 associated with sequence of numbers,
 205, 206
 (absolutely) p -Cauchy, 205, 206
 (absolutely) p -convergent, 205, 206
 p -divergent, 205
 Infinite series, 27–29
 Infinity, minus, 8, 15, 55
 plus, 8, 13, 15, 55
 Initial section, 10
 Integer, 11
 Integral, of Cauchy type, 134, 319, 320
 line, 102
 Riemann, 97
 Riemann–Stieltjes, 97
 Interchange of order of differentiation, 83,
 84
 Interior, 141
 Interior point, 119
 Intermediate value, 12 (Ex. 4.13)
 Intersection, 4, 5
 Interval, 9
 semi-, 9
 Into, 4
 Invariant, 256
 complete, 256
 numerical, 256
 Inverse, 4
 of element of group, 6
 Invertible, 281
 Involution, 20
 of C , linear, 258 (Ex. 3.8)
 Isolated point, 117 (Ex. 3.20)
 Isolated singularity of analytic function, 158,
 161

Isometry, 23

of C , 254, 255

Isomorphic, 12 (Ex. 4.15)

Isomorphism, 20

Isomorphisms of $M(S)$, S compact Riemann surface, 389–393

Iss'sa, H., 195, 389

Iterate, 24 (Ex. 2.9)

J

Jenkins, J., 340

Jensen, J., 213

Jensen formula, 213–216

Jordan, C., 39, 345

Jordan curve theorem, 39

Julia, G., 302

K

Kelley, J., 38

Kepler, J., 147, 157

Kepler equation, 147 (Ex. 9.5), 157 (Ex. 1.10)

Kernel (in sense of Carathéodory), 343

Kjellberg, B., 191 (Ex. 2.8)

Klein, F., 355, 379

Knopp, K., 28

Koebe, P., 290, 298 (Ex. 1.6), 355

L

Laguerre, E., 224

Laguerre, theorem of, 224 (Ex. 6.11)

Landau, E., 143 (Ex. 8.2), 243

Laplace, P., 87, 89, 137

Laplace integral, 137

Laplacian, 87

in polar form, 89

Large, 56

Laurent, H., 151, 152, 158

Laurent coefficient, 152

Laurent expansion, 152

Laurent pair, 152

Laurent representation, 152

Laurent sequence of f , a - (∞ -), 158, 159

Laurent sum, 152

Lebesgue, H., 44

Legendre, A., 223

Legendre relation, 223 (Ex. 6.10)

Leibniz, G., 114

Leibniz formula, 114 (Ex. 3.7)

Length, 96

of rectifiable closed curve, 112

Less than, 7

Lifting, 335

Limit, 13, 24, 42

finite, 14, 24

of sequence, 13, 42

Limit inferior, 15, 248

Limit superior, 15, 216

Line integral, 102

along rectifiable closed curve, 112

Linear differential equations, 282–286

with constant coefficients, 138 (Ex. 6.12)

Linear fractional transformations, 175 (Ex. 4.25), 325–328

Linear map, 23, 24

Liouville, J., 34, 114, 115

Liouville, theorem of, 34 (Ex. 5.10), 114, 115 (Ex. 3.9)

Littlewood, J. E., 35

Littlewood, Tauberian theorem of, 35

$\log(0)$, $\log(+\infty)$, 176 (Ex. 4.30)

Logarithm (complex domain), 71

analytic, 72, 127

continuous, 72, 128, 129

principal, 71

Logarithm (real domain), 14 (Ex. 5.1)

Logarithmic derivative, 91

Lower bound, 8

M

Magnification, isotropic (Streckentreue), 263

Majorant, 29 (Ex. 4.8)

Map, 4

covering, 335

Maximum, 8

Maximum principle for modulus of analytic function, 147 (Ex. 9.8)

Maximum value of real valued continuous function with compact domain, 45

Mean value theorem of differential calculus, 60 (Ex. 1.5)

Mergelyan, S., 342 (Ex. 1.5)

Meromorphic at, 167, 356

Meromorphic function, multiplicity of, 169, 356

zero of, 171

Meromorphic functions, local equivalence of, 170 (Ex. 4.15)

product and sum of, 168

Meromorphic in, on, 167, 356
 Metric, 50
 Metric space, 50–53
 Minimum, 8
 Mittag–Leffler, G., 195, 196
 Mittag–Leffler, theorem of, 196, 197
 Möbius, A., 175, 325
 Möbius transformation, 175 (Ex. 4.25), 325–328
 elliptic, 327
 hyperbolic, 327
 loxodromic, 327
 parabolic, 326
 Modular function λ , 330–337
 Modular groups, 259 (Ex. 3.14), 329, 331
 Modulus of continuity, 52
 Monodromy theorem, 290, 291
 Montel, P., 299 (Ex. 1.12), 300 (Ex. 1.15)
 Morera, G., 139
 Morera, theorem of, 139
 Mordell, L., 310, 311
 Morse, A. P., 131 (Ex. 5.10)
 Multiplicity, of analytic function, 143
 of meromorphic function, 169, 356

N

n th root, 73
 n th roots of unity, 73
 Nakai, M., 195, 200
 Natural number, 10
 Near, 56
 Negative, 7
 Negative part, 8
 Nehari, Z., 78 (Ex. 5.4)
 Neighborhood, 40
 Neutral element, 6
 Newman, M., 39
 Norm, 278, 279
 Normal family, 299 (Ex. 1.12)

O

Onto, 4
 Open, 40
 Open mapping property, 144
 Operation, binary, 5
 Order of point with respect to curve, 129
 Ordered field, 7–9
 Ordered pair, 4
 Ordered quadruple, 4
 Ordered triple, 4
 Osgood, W. F., 300

Osgood–Montel, theorem of, 300 (Ex. 1.15)
 Ostrowski, A., 116, 340

P

Parallelogram, 258, 259 (Ex. 3.12)
 fundamental, 313
 sensed periphery of, 311
 Parseval, M., 76, 155
 Parseval identity, for Laurent expansion, 155 (Ex. 1.4)
 for power series, 76
 Part (of set), 5
 Partitioning, 95, 96
 norm of, 96
 refinement of, 96
 Path, 49
 of singularity, 289
 Partial derivatives, of first order, 79
 of second order, 83
 Partial fraction decomposition, 157, 158
 (Ex. 1.13), 163, 164 (Ex. 2.15)
 Partial sum, 27
 Peano, G., 10
 Peano axioms, 10 (Ex. 4.1)
 Permanence principle (for differential equations), 291, 292 (Ex. 6.10)
 Perron, O., 306, 307, 384
 Perron family, 306
 Perron method, 307, 384
 Picard, É., 329, 330, 338, 339
 Picard theorem, big, 329, 338, 339
 small, 329, 330
 Pick, G., 226
 Plane, Gaussian, 22
 Poincaré, H., 382
 Pointwise Cauchy sequence, 26
 Pointwise convergent infinite series, 28
 Pointwise limit, 25
 Pointwise sum, 28
 Pointwise, tend, 25
 Poisson, S., 78, 295, 306, 384
 Poisson integral, 78, 295
 Poisson modification, 306, 384
 Polar representation, 73
 Pole, 159, 161
 order of, 159, 161
 Polynomial, 92, 370
 formal, 370
 degree of, 371
 normalized formal, 371
 multiplicative decomposition of, 92

Polynomials, ring of formal, 370
 Porter, M., 116
 Porter, example of, 116 (Ex. 3.16)
 Positive, 8
 Positive part of element of ordered field, 8
 Power of a b th, 74
 Power, analytic, 75, 127
 continuous, 75, 128
 Power series, 29–37
 coefficient of, 29
 formal aspects of, 267, 268 (Exs. 1.1, 1.2, 1.3)
 overconvergence of, 116 (Ex. 3.16)
 radius of convergence of, 30
 Power series type, function of, 82 (Ex. 6.7)
 Preimage, 4
 Prime Number Theorem (Hadamard–de la Vallée Poussin), 229, 243–249
 Primitive, 60, 61, 62
 Principal part, 163
 Pringsheim, A., 288
 Product, 11, 204–210, 212, 213
 Productible, 212
 uniformly, 213
 Productible (function factors), 213
 Projection, 42

Q

Quadrisection, 105

R

Radó, T., 298, 355
 Rational number, 12
 Ray, in Gaussian plane, 22
 initial point of, 256
 tangent, 262
 unit direction number of, 256
 Real axis, 22
 Real line, extended, 55
 Real number system, 9–12
 Real part, 19
 Reciprocal, 6
 Rectifiable, 96
 Region, 46
 Relation, 4
 equivalence, 170 (Ex. 4.15), 256
 Residue, 164–166, 381, 382 (Ex. 5.1)
 of abelian differential, 381, 382 (Ex. 5.1)
 invariance property of, 166, 167

Residue theorem, 183, 184
 applications of, 186–191
 Restriction, 4
 Riemann, B., *see below, see also* Cauchy–Riemann equations
 Riemann condition, 115 (Ex. 3.10)
 Riemann integral, 97
 Riemann mapping theorem (plane case), 341, 342
 Riemann surface (in sense of Weyl–Radó), 355
 analytic (harmonic, meromorphic) at point of, 356
 compact, 368–378
 Riemann zeta function, *see* Zeta function of Riemann
 Riemann–Klein, problem of, 370, 379, 380
 Riemann–Lebesgue lemma (C'), 244
 Riemann–Roch theorem, statement of, 383
 Riemann–Stieltjes integral, 97
 Riesz, F., 39, 122, 341, 347
 Rigid motion of C , 255
 Ring, 6
 commutative, 6
 Roch, G., 383
 Rolle, M., 60
 Rolle, theorem of, 60 (Ex. 4.1)
 Rotation, 23
 Rouché, E., 173, 174
 Rouché, theorem of, 173, 174
 Runge, C., 140, 317
 Runge theorem, on approximation by polynomials, 317, 318
 by rational functions, 140–142

S

Saks, S., 142, 183, 321
 Scalar, multiplication by, 278
 Schottky, F., 338
 Schottky theorem, 338
 Schwarz, H., 226, 302, 345
 Schwarz lemma, 226 (Ex. 7.1)
 Schwarz reflexion principle, 302, 303, 345–347
 Schwarz–Christoffel functions, 347–353
 Schwarz–Pick, lemma of, 226 (Ex. 7.3)
 Section, initial, 10
 Section of N , 10
 Section of Z , 11

- Segment, 9
 - in C , 22
 - Selection principle, 298, 299 (Ex. 1.9)
 - Semi-analytic, 131
 - Semi-interval, 9
 - Sentential function, 4
 - Sequence, 10
 - decreasing, 13
 - of functions, 25–27
 - increasing, 13
 - monotone, 13
 - m th term of, 10
 - never decreasing (increasing), 13
 - real, 12
 - Sequences, product (sum) of, 13
 - Set, 3, 4
 - Sierpiński, W., 4
 - Sign, change of, 130, 131 (Ex. 5.8)
 - Sign function, 59
 - Simply-connected, holomorphically, 125
 - homotopically, 124
 - Sine, 70
 - product formula for $\sin \pi z$, 200 (Ex. 1.8)
 - Singleton, 4
 - Singularity, 288
 - isolated (essential, polar, removable), 159, 161
 - Small, 56
 - Splitting, 46
 - Standard connectedness argument, 46
 - Stereographic map, 176
 - Stieltjes, T., 97, 300
 - Stieltjes–Vitali, theorem of, 300 (Ex. 1.14)
 - Stirling, J., 233, 234
 - Stirling formula, 233, 234 (Exs. 1.3, 1.4, 1.5)
 - Straight line (in C), 22
 - Strip, 118
 - positively sensed boundary path of, 118
 - Subgroup, 6
 - generated by, 6
 - Subharmonic function, 304–309, 384
 - mean value property of, 305
 - Subring, 6
 - generated by, 6
 - Subsequence, 10
 - Sum, 11, 210, 211, 268 (Exs. 2.1, 2.2)
 - of convergent infinite series, 28
 - Summable function, 211
 - Summable, uniformly, 211, 212
 - χ -uniformly, 212
 - Supremum, 8
- T**
- $\tan(\text{gent})$, 86
 - Tauber, A., 35
 - Tauber, theorem of, 35, 36
 - Taylor, B., 65
 - Taylor series, 65, 66
 - Topological index, 129
 - Topological space, 39–43
 - discrete, 259 (Ex. 3.13)
 - Topology, 40
 - generated by, 40
 - Hausdorff, 40
 - product, 42
 - relative, 41
 - standard (R, C), 40 (Exs. 1.1, 1.2)
 - Translation, 23
 - Trichotomy, 7
- U**
- Uniform limit, 26
 - Uniform sum, 28
 - Uniformizer, 356
 - Uniformly in (in sense of Valiron), 52
 - Uniformly, tend, 26
 - Uniformly, χ -, 178
 - Union, 4, 5
 - of functions, 5
 - Univalent, 5
- V**
- Valence, 143, 170, 368
 - of λ , E -, 333
 - Valiron, G., 52
 - Value function, 321
 - Value (of function), 4
 - Variation, P -, 96
 - total, 96
 - Vector, 278
 - norm of, 278
 - Vector space over C , normed right, 278
 - right, 278
 - Vitali, G., 300
 - Vivanti, G., 288
 - Vivanti–Pringsheim, theorem of, 288 (Ex. 6.2)
 - v. Stachó, G., 63

W

- Walsh, J. L., 342
- Weierstrass, K., *see* below
- Weierstrass approximation theorems, 300, 301 (Ex. 2.1)
- Weierstrass canonical product, 219
- Weierstrass continuation class, 289, 358–368
- Weierstrass double series theorem, 116 (Ex. 3.11)
- Weierstrass gap theorem, 383 (Ex. 5.5)
- Weierstrass M -test, 29
- Weierstrass ρ , σ , and λ functions, 222, 223 (Ex. 6.10), 313, 314 (Exs. 2.3, 2.4)
- Weierstrass preparation theorem (Vorbereitungssatz), 314–316
- Weierstrass primary factor, 197, 198
- Weierstrass theorem, on essential isolated singularities, 159
 - on maximum and minimum, 45
 - on meromorphic function with assigned divisor, 197, 198
- Well-ordering of $\mathbb{N}$, 10 (Ex. 4.5)
- Weyl, H., 33, 355, 359
- Weyl, equipartition theorem of (Gleichverteilungssatz), 33 (Ex. 5.9)
- Weyl–Radó, Riemann surface in sense of, 355
- Wiener, N., 4, 243
- Wiener’s proof of Prime Number Theorem, 243

Z

- Zero, 6
 - of meromorphic function, 171
- Zeta function of Riemann, 207 (Ex. 3.10), 237–243
 - functional equation of, 240
 - Riemann’s hypothesis concerning zeros of, 241
 - theorem of Hadamard and de la Vallée Poussin concerning zeros of, 242, 243
- Zeta function of Weierstrass, 223 (Ex. 6.10)
- Zygmund, A., 142, 183, 321
